

BMC Multi-Cloud Service Management

Create an integrated service experience across your multi-cloud environments

PRODUCT DESCRIPTION

Multi-Cloud Service Management is a flexible, configurable cloud-based service that empowers organizations to resolve issues and manage their portfolio of on-premises, cloud, and hybrid IT services.

BUSINESS CHALLENGE

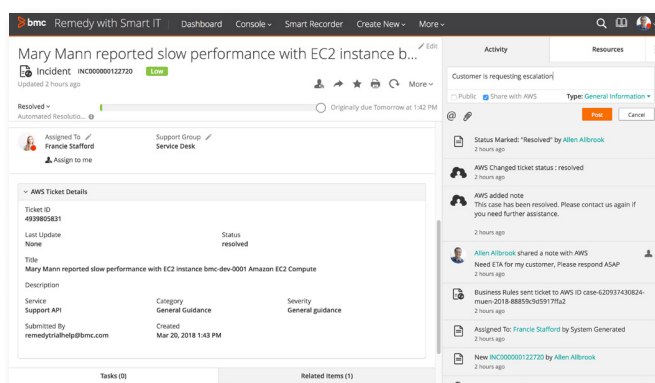

Digitally transformed enterprises utilize hundreds of cloud services from multiple cloud vendors across their organizations. **IT organizations face the daunting tasks of not only cost-effectively managing these services but also efficiently resolving support and service issues.** Current methods for incident resolution require manual management of incident issuing and tracking between the service desk to the third-party service and/or provider.

IT must be able to:

- Collaborate effectively with service vendors to troubleshoot/resolve issues
- Tightly integrate incident and change management with leading agile development solutions
- Audit service performance capabilities to measure service integrity

BMC SOLUTION

Multi-Cloud Service Management enables multi-provider brokering to efficiently manage and resolve issues. Augmenting the capabilities of Remedy Service Management Suite, Multi-Cloud Service Management helps organizations solve specific challenges of managing cloud services through an integrated and shared service desk.

KEY FEATURES

Multi-Cloud Service Management enables multi-service and provider brokering to efficiently manage and resolve issues.

- **Native SaaS** – Architected and designed to leverage the flexibility and capabilities of the cloud
- **Fast time-to-value** – Out-of-the-box flows with leading vendors for easy deployment
- **UI-driven configurability** – No-code UI and process configurations and extensions
- **Mobile/web UI** – Manage vendor ticket/incidents from your mobile device
- **Forward compatibility** – Pre-validated with future Remedy releases

KEY BENEFITS

- **Better customer service** with less downtime due to unresolved issues
- **Cost-efficient and effective** resolution of problems
- **Flexibility to choose the best solutions** and not worry about the level of support service
- **Better/more informed management** of your cloud service/provider investment
- **Predictable and high performance environments**

- **Multi-Cloud Service Management integrates both service desks to collaboratively resolve and mitigate issues.**

PRODUCT DETAILS

Cloud-based service solution: Optimized to manage hybrid environments.

Collaborative, automated incident brokering: Integrate and manage incidents directly into the cloud provider's service desk.

Collaborate instantly: Communicate, manage, and mitigate issues from a familiar service desk and device of choice.

Ticket generation: Create, view, update, escalate, and generate reports of tickets across cloud services and/or providers to help resolve issues faster and with more efficiency.

Grouping: Assemble multiple related tickets into a single change across service desks (i.e., Jira user stories/defect systems in/out of Remedy).

Insight-driven reporting: Deliver detailed, graphical dashboards to data and trends in cloud services/providers.

Service performance management: Get at-a-glance reports detailing overall status, uptime, notifications, and other service metrics.

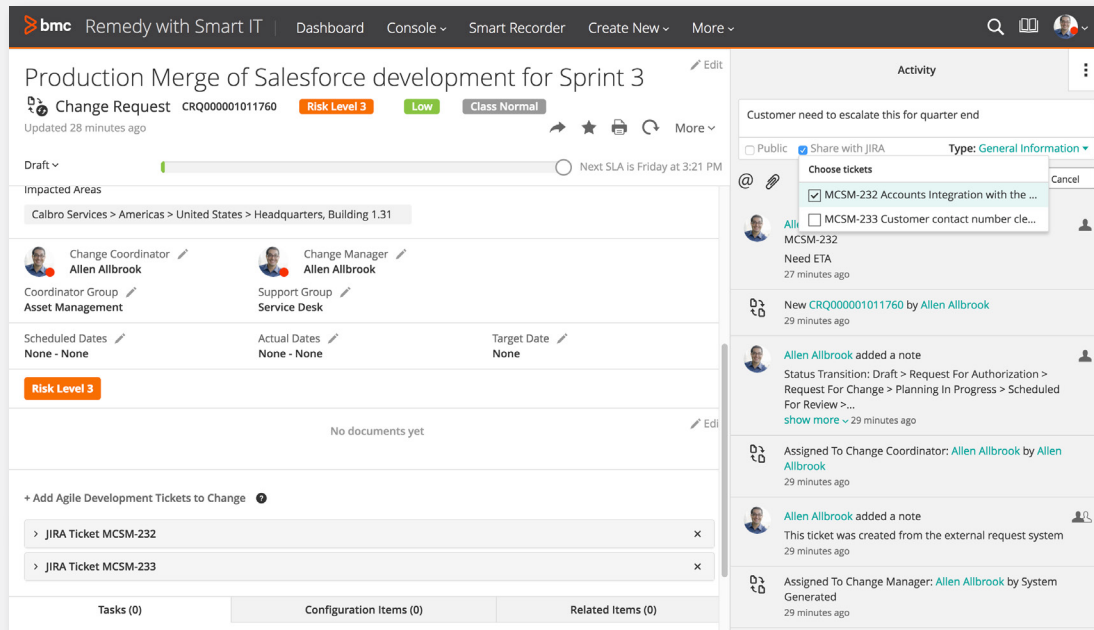

Modular and configurable: Add/change services and reporting easily, even after deployment.

Out-of-the-box connectors: Get integrated brokering with leading cloud providers and services.

Connect to additional dev tools: Easily develop and configure brokering interfaces into additional dev tools.
