

PRODUCT DETAILS

- Ready-to-run virtual appliance minimizes deployment time and effort
- Agent-less discovery means there is no software to roll out to servers
- Out-of-the-box recognition rules allow you to discover servers, software, storage, and network relationships with no scripting required
- Easy-to-use appliance clustering technology achieves exceptional performance and near-limitless scale
- Collaborative application mapping reduces time and effort to map business applications
- Data provenance feature shows precisely how the data was discovered right in the UI
- Flexible discovery process is easy to extend or limit to best fit your organization
- Robust analytics engine enables you to easily slice, dice, and analyze the data
- Powerful reasoning engine and high-performance NoSQL graph database are specifically tailored to the requirements of a discovery system
- Software reference library tracks software end-of-life dates to expose risks with unsupported software
- Hardware reference library helps quickly identify inefficient hardware
- Broad pattern library is updated monthly
