

# BMC Premier Support

Proactive support tailored for your BMC solutions

## BUSINESS CHALLENGE

Companies using complex technologies and mission-critical applications to support their key business drivers are exposed to greater levels of risk without reliable and personalized support. Rapid data growth and increasing user demands are constantly changing the requirements of IT, forcing companies to be even more agile and acutely responsive to changes. Shifting from a reactive to a proactive support model to lower risk and cost, increases solution performance and reliability, and delivers faster ROI and better stakeholder satisfaction.

## BMC APPROACH

**BMC Premier Support is a proactive support service that provides technical expertise to customers who require increased attention and responsiveness.** BMC Premier Support's predictive and preventive engagement model ensures quick and insightful responses, no matter what the issue may be.

Benefits of BMC Premier Support include:

- + Faster issue resolution
- + Higher availability and performance
- + Reduced operational risk and cost
- + Increased technology adoption
- + Accelerated ROI

## OFFERING DETAILS

BMC Premier Support enhances our Continuous Support model, which is already included with every BMC solution. Customers get access to a highly skilled team who focuses on both business and IT strategies.

We offer two configurations of Premier Support services: **Premier Support Advanced** and **Premier Support Managed**.

- + **Premier Support Advanced** is our most comprehensive offering for customers with mission-critical requirements. We extend our customers' teams with a BMC Premier Support account manager and Premier Support architect to work with existing staff to understand their business and IT objectives through a strategic, proactive approach focused on measurable results. Premier Support Advanced provides enhanced SLAs, business planning, environment testing, and quarterly assessments—improving our customers' key business outcomes.
- + **Premier Support Managed** is a starter offering for our customers who need basic preventive support assistance to enhance their existing resources. Customers are assisted by a BMC Premier Support account manager, receive a subset of the Premier Support Advanced services, and maintain a consistent focus on achieving their business outcomes.

## CUSTOMER EXAMPLE

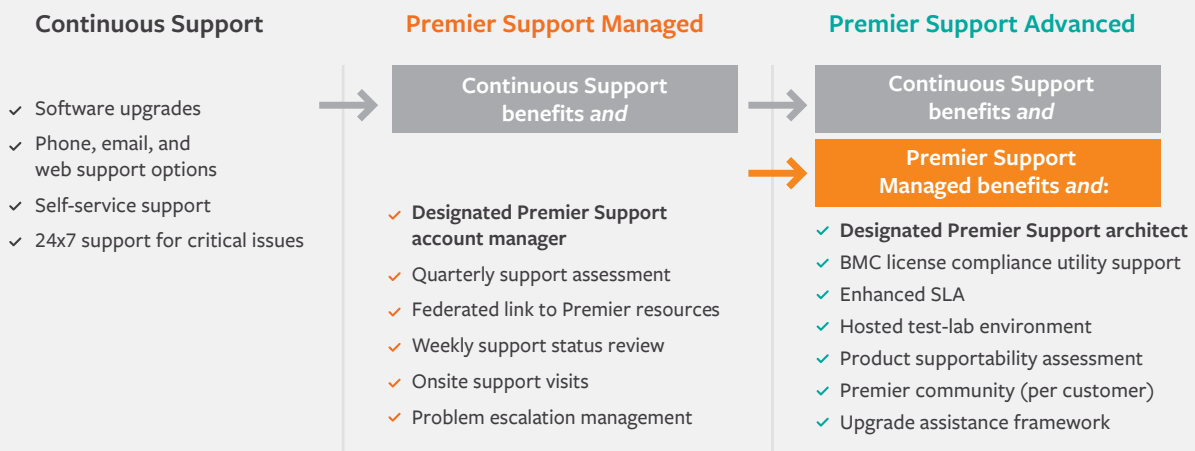

### Global IT Consulting Firm

This company manages their mission-critical BladeLogic Server Automation (BSA) environment, hosting nearly 45,000 servers for over 90 customers who have limited downtime available for accommodating updates and patches. Upgrading their environment needed to occur directly on the production environment because no testing environment was available for the upgrade. They called on BMC's Premier Support team to test the upgrade in a mock-up lab and document all the steps necessary to complete the upgrade. The Premier Support team utilized BMC's **Assisted MIGration Offering (AMIGO)** program to review and certify the upgrade plan, and ensure that it used all the best practices for the implementation. The upgrade was completed in less than four days, within the approved downtime, reducing the impact to the customers hosted on the platform.
