

MainView for CICS®

Manage your entire IBM® CICS® environment from a single view and control

PRODUCT DESCRIPTION

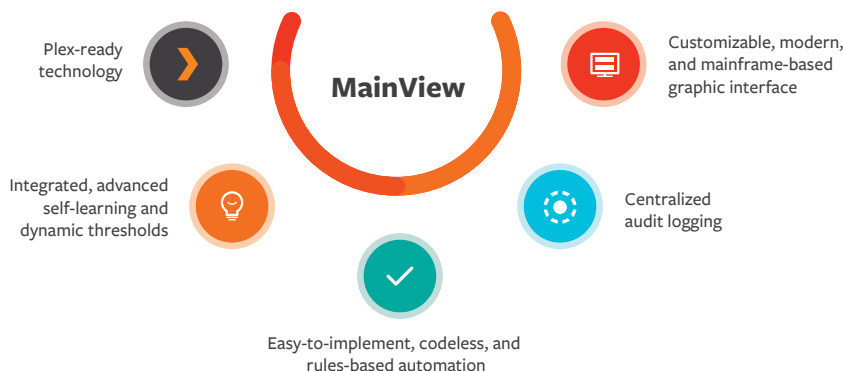

MainView for CICS® uses a powerful, modern graphic interface with a single view and control for your entire CICS environment, and provides fast and easy troubleshooting capabilities.

BUSINESS CHALLENGE

Digital customers require rapid response times. Any delays in CICS processing can impact performance and business. Proactive management of CICS and CICSplex® requires tools that are tightly integrated with other products in your environment. They must also provide capabilities that improve staff productivity and be easy for mainframe professionals to learn and use. **Mainframe IT needs a single view of how transactions impact CICS resources to simplify management of an ever-increasing number of transactions.**

BMC SOLUTION

MainView for CICS brings advanced monitoring capabilities for traditional CICS and parallel processing environments. Its tightly integrated components make troubleshooting quick and easy. It supports the CICS transaction gateway, auto-connects to CICS regions, and simplifies monitoring of CICS resources in MRO environments, enabling you to manage your entire CICS environment from a single view and control. Leverage an at-a-glance overview of transactions running in a CICSplex or a single CICS region. See how each transaction is using CICS resources to improve performance and availability and optimize costs by managing resource consumption.

KEY FEATURES

MainView for CICS allows you to manage your entire CICS environment from a single view and control.

- **Modern** – Use a single view and control to monitor an unlimited number of CICS environments, systems, and tasks
- **Fast and easy** – Deliver critical CICS metrics across the enterprise
- **Smart** – Monitor transactions, response times, and more, while also providing detailed reporting
- **Intuitive and integrated** – Use a customizable modern, mainframe-based graphic interface

KEY BENEFITS

- **Deliver highly efficient, yet low overhead monitoring** to improve productivity and reduce costs
- **Simplify the monitoring and management of CICS resources in MRO environments** to improve performance and availability
- **Resolve problems quickly** by tracking transactions from CICS into other MainView products and using smart alarms to proactively identify performance issues
- **Improve productivity and reduce training requirements** with an intuitive interface, single view and control, and easy integration with other MainView products

- ◀ MainView for CICS provides intuitive, integrated CICS management to identify and resolve performance issues before they cause problems.

PRODUCT DETAILS

This product is part of MainView for CICS Management and works with the other products in that solution to offer insight and control over every component of your CICS environment.

Parallel Sysplex support: It provides a comprehensive, cost-effective solution for CICS system management in a CICSplex environment and offers advanced Sysplex-ready management capabilities. Everything is included at one price with no extra cost upgrades or hardware required.

Single view and control: MainView offers a single view and control to manage your environment most effectively.

Enhanced productivity: Increase productivity and minimize training with a customizable, mainframe-based, and modern graphic interface that's integrated with other MainView products. Pinpoint application trouble spots and access hierarchical views and hyperlinks to related information. Move throughout the CICS environment to access more detailed information and take corrective actions to solve performance problems and keep digital business flowing smoothly.

Best practices: Enable best practices to be implemented by quickly locating the cause of problems and providing rapid remediation.

Integrated solution: MainView for CICS is just one of a set of transparent, integrated technologies that provides increased savings and optimizes processes. Maximize existing technology investments with MainView, regardless of the platform.

Time saving CICS analysis: Obtain an at-a-glance overview of transactions running in a CICSplex or a single CICS region and see how each transaction is using CICS resources. It tracks and records the response time of each CICS transaction and displays an overview of the percentage of elapsed time spent in an individual CICS component during the transaction lifecycle. The solution breaks down the total transaction count and average response time by CICSplex, CICS workloads, or CICS region. It displays wait or usage times as a percentage of all major suspend categories defined by CICD.

Rapid problem solving: Solve problems quickly with integrated information on critical CICS metrics, such as region, task, lock and delay analysis, programs, CP, storage, and VSAM across the enterprise to manage resources effectively and efficiently. View the trace detail online or through batch reports.
