BMC SecOps Solutions

Proactively mitigate security risks with automation and holistic visibility

INCREASING THREATS

To compete in the digital era, organizations need to deliver new and innovative applications at a much faster pace and cope with exponentially growing data volume. Meeting these demands significantly increases complexity across the IT environment, while generating enormous amounts of data inspires hackers to become much bolder in their attempts to breach systems. This is a pivotal time for IT leaders, who must find a way to meet soaring customer expectations, comply with the rapidly growing number of complex regulatory standards, and defend their IT infrastructure against the increasing volume and scope of cyber threats.

CHALLENGES

Many organizations are discovering that the tools, processes, and teams tasked with protecting their IT infrastructure are not able to cope effectively with the rising tide of attacks. Hackers are taking the path of least resistance, exploiting known vulnerabilities that simply haven’t been patched yet.

BMC SOLUTION

BMC SecOps solutions automate prioritization and remediation of the most critical vulnerabilities or compliance violations. By combining vital context with unprecedented visibility into data center assets and their relationships, BMC SecOps solutions help improve productivity and scalability by breaking through functional silos to incorporate security into operational processes. Enterprise-grade remediation for known and unknown threats protects network uptime and maintains stability.

FEATURES

Compliance Controls
• Ensure continuous compliance with a full cycle of system discovery, monitoring, remediation, and integrated change control

Security View of Operational Plans
• Visualize how quickly risks will be eliminated with graphical views of planned operations actions, predictive SLAs, and burn-downs

Service and Operational Analytics
• Address risks based on policy and impact to ensure the most critical issues are fixed first, uptime is protected, and stability is maintained

Blind Spot Protection
• Identify assets that are unmonitored and potentially exposed, and automatically map dependencies

BENEFITS

Agile Execution
• Accelerate remediation of vulnerabilities while driving operational excellence with automation to avoid security incidents

Integrated Visibility
• Enable coordination between security and operations teams fueled by integrated and holistic visibility into risks, impacts, and operational plans

Rigorous Controls
• Gain visibility, consistency, and reliability across processes to increase speed, reduce errors, and simplify governance
BMC delivers software solutions that help IT transform digital enterprises for the ultimate competitive business advantage. We have worked with thousands of leading companies to create and deliver powerful IT management services. From mainframe to cloud to mobile, we pair high-speed digital innovation with robust IT industrialization—allowing our customers to provide amazing user experiences with optimized IT performance, cost, compliance, and productivity. We believe that technology is the heart of every business, and that IT drives business to the digital age. BMC – Bring IT to Life.

BMC SECOPS SOLUTIONS

TrueSight Vulnerability Management

TrueSight Vulnerability Management delivers a security solution that provides critical information to enable security and operations teams to effectively attack risk in their environment. It remains the only automation solution that natively integrates vulnerability scan data with operations data, which ultimately allows for automatic, enterprise-grade remediation.

TrueSight Server Automation

TrueSight Server Automation quickly and securely provisions, configures, patches, and maintains physical, virtual, and cloud servers.

Customer Spotlight

Transamerica

Background: Transamerica Life Insurance Company, part of the Aegon Group, provides a variety of financial services—from life insurance to retirement plans—to more than 20 million people worldwide.

Challenge: Transamerica’s Global IT organization was faced with the task of maintaining and demonstrating compliance with multiple standards quickly while consuming as few resources as possible.

BMC SecOps Solution: Global IT is leveraging TrueSight Server Automation and Remedy Service Management Suite to power an intelligent closed-loop compliance process that validates compliance; identifies, fixes, and revalidates out-of-compliance servers; and creates audit reports.

Results: The closed-loop compliance process has slashed resolution times for compliance issues from days or even weeks to minutes. The compliance process has also reduced the auditing preparation effort from six people working for a week, to one person spending just a few hours.

About BMC

BMC helps customers run and reinvent their businesses with open, scalable, and modular solutions to complex IT problems. Bringing both unmatched experience in optimization and limitless passion for innovation to technologies from mainframe to mobile to cloud and beyond, BMC helps more than 10,000 customers worldwide reinvent, grow, and build for the future success of their enterprises.
