

Why Every Mainframe Shop Needs BMC MAINVIEW SRM

- 10** Everyone needs **intelligent software** to manage critical storage resources. Software that includes built-in intelligence can guide you through the key storage tasks ensuring that you allocate and manage your storage footprint effectively
- 9** **Web-enabled.** BMC MAINVIEW Explorer provides **access to the BMC MAINVIEW SRM products from a web browser.** You can easily monitor storage resources from a single, easy-to-use graphical user interface or from a traditional 3270 “green screen.”
- 8** **DFSMS, fully supported.** BMC MAINVIEW SRM Allocation supports and extends DFSMS implementations, and can even manage data sets that are not managed by DFSMS.
- 7** **Centralized management.** BMC MAINVIEW SRM Automation centralizes management of z/OS storage automation and exception processing.
- 6** **Conserves costly resources.** BMC MAINVIEW SRM Reporting resolves many problems automatically with unlimited, escalated actions and self-monitoring, saving valuable staff resources.
- 5** **More uptime.** BMC MAINVIEW SRM StopX37/II improves availability by preventing out-of-space abends before they affect system performance.
- 4** **Better integration.** Several point products were merged into three integrated solutions: BMC MAINVIEW SRM Allocation, BMC MAINVIEW SRM Automation, and BMC MAINVIEW SRM Reporting. BMC MAINVIEW SRM StopX37/II is available as a stand-alone product as well as a component of BMC MAINVIEW SRM Allocation.
- 3** **It's batch enabled.** BMC MAINVIEW SRM solutions enable batch reporting as well as online views.
- 2** **Full customizable views.** With BMC MAINVIEW SRM, all views can be customized. The menu-powered customization allows you to rearrange, exclude, or include columns, change threshold values and colors, and use filtering to display only matching values.
- 1** **It's affordable.** BMC MAINVIEW SRM provides superior mainframe storage resource management at a **competitive price.**
