

BMC *Insight!* for Security Operations

Understand cybersecurity threats in your environment to help close the Security/Operations (SecOps) Gap

OFFERING DESCRIPTION

The BMC *Insight!* for Security Operations (SecOps) workshop takes a pragmatic approach by analyzing the current state of your SecOps solution and process capabilities. As part of this service, BMC will provide recommendations for improvement, a Risk Threat Matrix, Notional Architecture, example SecOps Service Catalog, and a short-term roadmap to drive vigilant, precise, and relentless compliance. BMC has found that customers benefit from this type of service when there is a need to focus on the optimization of their SecOps solutions and processes and deliver the most value in the shortest amount of time.

BUSINESS CHALLENGE

IT is under pressure to close the SecOps Gap. Companies are focused on improving security risk management, yet determining security risks is a difficult process. **Security and operations teams can benefit from expert assistance in prioritizing threats, vulnerabilities, and risks** and understanding potential areas of weakness.

BMC SOLUTION

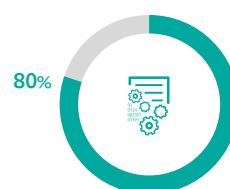

The workshop identifies and/or confirms current pain points and business opportunities, and then relates this information to the relevant SecOps processes and supporting solutions. Our experts lead a collaborative engagement to **enable your organization to envision and achieve your desired future state** utilizing BMC's expertise in SecOps. Working with members of your team, we define milestones to help you move forward with your initiative with confidence—and achieve a successful outcome with minimal risk.

Security

Close the window of vulnerability

43% of companies have had a data breach

Operations

Reduce downtime

80% of downtime is due to misconfigurations

KEY FEATURES

The BMC *Insight!* for Security Operations workshop highlights the specific capabilities required to achieve customer goals—and a recommended path to get them there.

- **Create a prioritized Risk Threat Matrix** with mitigation recommendations
- **Define a value-based prioritized SecOps Roadmap** detailing recommendations and next steps to quickly drive adoption
- **Maximize alignment** with BMC's Vigilant Compliance capabilities
- **Define business-centric SecOps Notional Architecture** to close the SecOps Gap

KEY BENEFITS

- Clearly identifies **primary cyber security risks** associated with each customer's specific regulatory requirements.
- **Prioritizes risks based on threat and vulnerability** in order to focus efforts associated with remediation activities.
- Provides a SecOps security service catalog template to **help security personnel understand the impact to business-critical services** by cybersecurity vulnerabilities.
- Includes a SecOps roadmap to aid in the **graphic depiction of activities associated with a SecOps program.**

- ◀ Security and operations teams can work together to reduce security breaches.

OFFERING DETAILS

The BMC SecOps *Insight!* Workshop is a four-day activity that provides recommendations for improvement, a Risk Threat Matrix, Notional Architecture, a sample SecOps Service Catalog, and a short-term roadmap to drive vigilant, precise, and relentless compliance using BMC's automation solutions. The workshop highlights the specific capabilities required to achieve the goals that most security and IT operations teams require.

Key activities performed during the four-day engagement:

- Confirm goals and objectives
- Determine timeline for project
- Identify process owners and operators
- Conduct workshop onsite for up to one day
- Conduct analysis and create deliverable

The primary deliverables provided at the end of the workshop are:

- Detailed Risk Threat Matrix with mitigation recommendations
- Prioritized SecOps Roadmap detailing recommendations and next steps
- Business-centric SecOps Notional Architecture
- Example SecOps Service Catalog translates IT view into business view to show customers services provided by the SecOps team
