

BMC TrueSight

Stay ahead of the market with superior IT analytics, critical insight, and predictive performance

PRODUCT DESCRIPTION

BMC TrueSight is the availability, performance, and capacity management solution that keeps business services competitive with insights based on powerful analytics. TrueSight addresses the past through root cause analysis, the present through real-time analytics, and the future through predictive planning.

BUSINESS CHALLENGE

IT is coping with many new technology trends, such as mobile, cloud service delivery, virtualization, and big data. **These trends are driving a need for a seamless, insightful IT experience**—necessitating a more powerful, holistic, and integrated approach to IT performance and availability management. With each leap in the digital evolution, IT must respond—or risk losing customers to companies that can.

BMC SOLUTION

BMC TrueSight provides granular insight into infrastructure health and performance through a single pane of glass. With TrueSight, you can anticipate capacity requirements from existing and future workloads—optimizing resources to avoid overspending and control risk. **You'll gain comprehensive visibility—from device to application and from systems to services, whether running on a traditional, private, or hybrid cloud.**

TrueSight also makes mobile IT management a reality. With flexible support for iPad, iPhone, and Android, TrueSight delivers leading operations management and capacity optimization capabilities for today's mobile, social, always-on world. TrueSight gives IT the insight and perspective needed to support availability and drive performance.

Digital Enterprise Management

KEY FEATURES

- **Industry-leading event management technology** prioritizes events according to business impact, allowing IT operations to focus on what matters most to the business
- TrueSight **automates the capacity management and planning activities** as well as the support and integrated demand and capacity management process
- TrueSight **provides capacity and cost visibility to all stakeholders and tenants**, improving operational efficiency and promoting tighter process integration and cooperation between IT operations and applications teams

KEY BENEFITS

- **Reduce # of false alarms by 90%** with probable cause analysis
- **Build simple service models in 5 minutes** with auto-detecting Application Context Views
- **Get unprecedented capacity management insight** with 50 out of the box reporting templates and 16 views
- **Predict capacity requirements** with 21 different forecasting models

- ◀ TrueSight Capacity Optimization provides capacity and cost visibility while minimizing business risks, supporting decision making on IT investments, and enabling IT to be flexible and agile.

PRODUCT DETAILS

Operational Efficiency: Move beyond organizational siloes and promote operational efficiency.

Unprecedented Visibility: Gain visibility —from device to application, from systems to services, whether running on a traditional, private, or hybrid cloud.

Granular Insight: Attain granular insight into infrastructure health and performance through a single pane of glass.

User-centric Design: Gain deep visibility into application performance from a customer perspective.

Planning Capabilities: Anticipate capacity requirements from existing and future workloads and optimize resources to avoid overspending and risks.

BMC's TrueSight accelerates a much needed advance in the modernization of IT's abilities for proactive monitoring, managing and resolving the increasingly complex problems of delivering IT services. This approach places them at the "head of the pack." No other vendor has adopted and implemented an equivalently comprehensive integration of function with a comparable focus on the user's experience."
