Installing Control-M Workload Automation Application Plug-ins 1.0.00.200

1. Installing the Application Plug-ins on the Control-M/EM client:
 - o Download and save the PAZVO.1.0.00.200.zip file to a temporary directory
or
insert the DVD
 - o Close the Workload Automation GUI and the Control-M configuration manager (CCM).
 - o If you chose the .zip file, navigate to the temporary directory you created, open the PAZVO.1.0.00.200.zip file, and run EM.exe file
or
If you inserted the DVD, navigate to the Windows directory.
 - o Run Install_EM_Client_Plugins.cmd script located under the '<extracted folder>\EM\' folder.
2. Installing the Application Plug-ins on the Control-M/EM server (only for FileWatcher and OS400 users):
 - o Navigate to the ApplicationFields folder located under '<extracted folder>\EM\Plugins\'.
 - o Copy all the files under this folder location into the EM Server file system:
 - * Windows - <EM 8.0.00 home>\etc\applfields
 - * Unix - <EM 8.0.00 home>/etc/applfields

Note: some of the files may already exist and will be replaced by the new files.
 - o Restart the GUI server.

Support for Control-M Workload Automation Application Plug-ins 1.0.00.200
