Control-M/Enterprise Manager

Version 8.0.00.700
July 2015
Tracking number: PANFT.8.0.00.700

BMC Software is announcing the support of the Control-M/EM version 8.0.00.700 on Linux Red Hat 7.

NOTE: The configuration change is only required for fix pack 7. There is no need to apply the change to later fix packs, as the change is already included.

Configuration changes

To use Control-M/EM 8.0.00.700 on Linux Red Hat 7, the following configuration changes must be made in the CCM:

2. Click the Advanced tab and search for the parameter ShortestSlptimeMicros.
3. In the Value field, if the value is set to less than 1000, type 1000.
4. Restart the GCS server.

The configuration changes are required to avoid certain circumstances in which GCS (Global Conditions Server) CPU is high.

If you have any questions about this announcement, please contact BMC Software Customer Support at 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
