

Migrate to BMC Helix Optimize

WHY NOW?

The speed of innovation and market demand requires companies to take a hard look at how business services are delivered and ensure that tools and processes serve growth initiatives. BMC Helix Optimize delivers the fast time to value and flexibility that ensures IT resources and cost are always aligned to business priorities.

BMC Helix Optimize is part of BMC Helix, an end-to-end cloud native service and operations platform powered by AI/ML.

WHAT IS BMC HELIX OPTIMIZE?

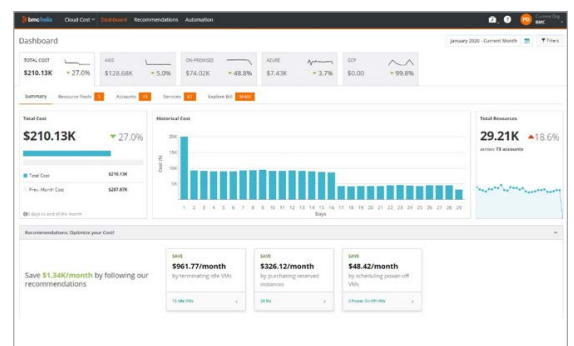

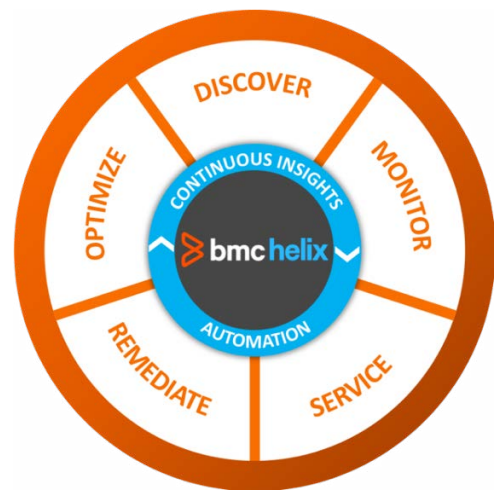

BMC Helix Optimize is a solution set that includes BMC Helix Capacity Optimization and BMC Helix Cloud Cost. By combining the capabilities of these solutions, IT organizations have the insights to balance IT costs and business risk.

BMC HELIX CAPACITY OPTIMIZATION

BMC Helix Capacity Optimization provides visibility into the entire IT infrastructure—physical, virtual, containers and cloud—so IT can easily add, remove, or adjust compute, storage, network, and other IT infrastructure resources to meet changing application and service demands. Service views, forecasting, modeling, and simulated migration capabilities provide the insight for future resource needs and the ability to control the timing and cost of new capital and operating expenditures. Self-service dashboards and reports keep project owners, business owners and other stakeholders informed.

BMC HELIX CLOUD COST

BMC Helix Cloud Cost provides visibility and control of cloud costs. Self-service views keep budget owners, project owners and stakeholders informed and in control of their cloud operational spend and budgets. With automated recommendations and actions, cloud resource services remain optimized, eliminating wasted spend. Using machine learning, anomalous spending is detected. This, along with thresholds and alerts on spend, keep budget owners informed and in control, preventing budget over-runs. The ability to establish and automatically enforce business guidelines ensure cloud buying and operations are compliant with business and regulatory policies.

Why Migrate?

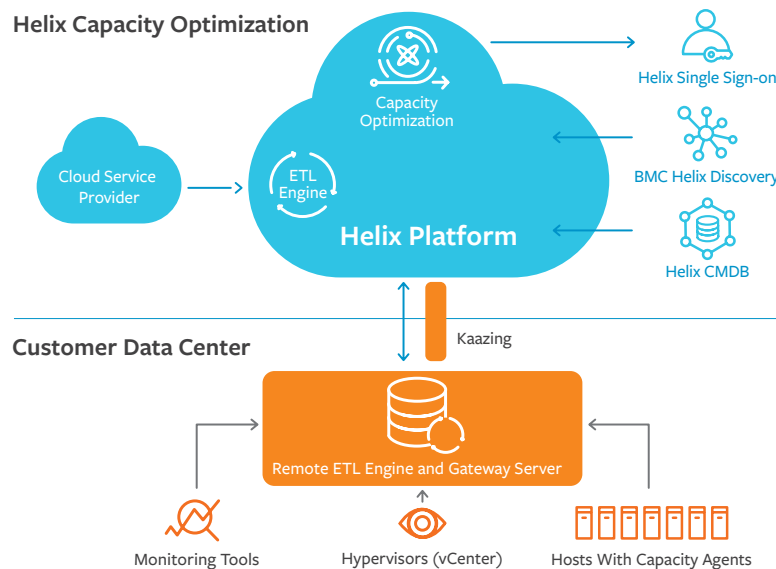

BMC Helix Optimize delivers the combined power of IT resource and cost optimization while ensuring business services run as expected. BMC Helix Optimize provides the following benefits.

- **Choice.** Determine where you want to deploy BMC Helix Optimize – on AWS cloud or BMC cloud. You decide which best fits your business operations. You get the same comprehensive capabilities regardless of the platform you choose.
- **Faster time to value.** Moving to SaaS means enabling faster upgrades and access to innovations for your users. BMC Helix Optimize upgrades are managed by the BMC Helix SaaS Operations team to free your IT team from administrative tasks and ensure you are always on the latest release so you can take advantage of new capabilities and innovations.
- **Lower cost of ownership.** SaaS deployment allows customers to shift from CapEx to OpEx. In addition, avoiding the costs of procurement, deployment, maintenance, and upgrades significantly reduces cost of ownership.

- **Lower business risk.** With the help of the BMC team, reduce or eliminate operational issues that cause business interruption. BMC monitors Helix components. BMC teams have direct access to R&D for faster problem resolution.
- **Compliance and security.** Important platform security elements are also managed by the BMC team including data privacy and data protection, system access, third-party audits and disaster recovery. Security is based upon NIST controls and standards and includes redundant controls – all to protect confidentiality, availability, and integrity of your data and services.

The Migration Process

Existing customers have an effective route to migration to BMC Helix Optimize. After assessing your current deployment of TrueSight Capacity Optimization, including product customizations and your business requirements, BMC Customer Success will work with you to develop the best plan for migrating to BMC Helix Optimize.
