

BMC AMI Ops Insight

Move your mainframe operations team from reactive to proactive, detecting problems before they impact your mission-critical environment

PRODUCT DESCRIPTION

BMC AMI Ops Insight is a forward-looking tool that helps mitigate issues before they become business problems. Using machine learning it learns what normal is, detects anomalies, and maximizes lead time for remediation.

BUSINESS CHALLENGE

Managing the mainframe has never been more complex. Companies are being tasked with better performance and 24/7 availability while also addressing workforce changes that are resulting in a great loss of expertise.

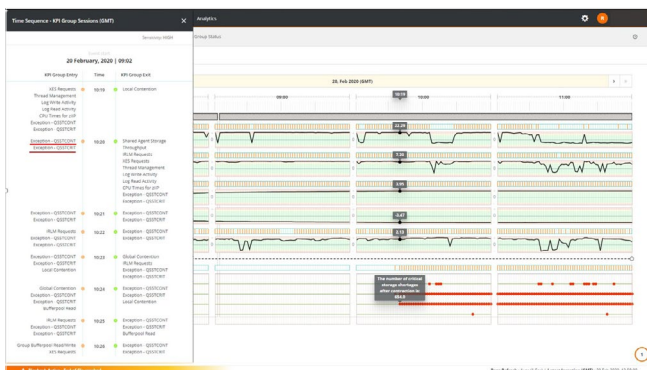

BMC SOLUTION

Using machine learning BMC AMI Ops Insight learns what normal is, detects anomalies, minimizing detection time while maximizing lead time for remediation. Multivariate analysis looks across key metrics simultaneously to ensure nothing is missed and reduces false positives. Built-in domain expertise and data science lowers the learning curve for newer employees by tracking carefully selected key metrics and connecting the dots so they don't have to spend time configuring the solution and navigating through trial and error.

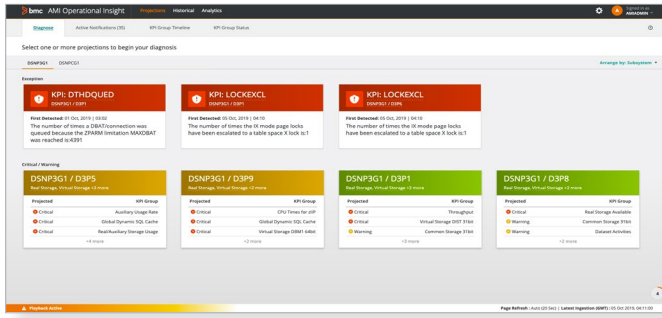

KEY FEATURES

BMC AMI Ops Insights sees issues before they become business problems.

- **Proactive alerts** – get relevant notifications when a potential problem is identified.
- **Multivariate analysis** – looks at cross-domain metrics simultaneously so that nothing is missed.
- **Domain expertise** – Data Science and Domain Expertise are built-in for greatest detection value, reducing guesswork to determine important metrics and not wasting costly MIPS by collecting and evaluating extraneous metrics.
- **Easy to install, easy to use** – Minimal configuration required, simply add your data and realize immediate value with out of the box intelligence.
- **Customized learning** – Deep and broad data is consumed as it is always learning and getting smarter to support your complex system.

- BMC AMI Ops Insight presents all active notifications facilitating further understanding the problems active in the environment

 BMC AMI Ops Insight Diagnose View provides a summary of all active projections and tools to get further problem details

KEY BENEFITS

- **Immediate value** – Install, add your data, and begin realizing immediate value with minimal configuration.
- **Customized learning** – Deep and broad data is consumed as it is always learning and getting smarter to support your complex system.
- **Reduced time to detection** – Problems detected and notifications are sent before they have impact.
- **Fewer false positives** – Multivariate analysis looks across all the KPIs simultaneously so that nothing is missed.
- **Built in industry expertise** – The built-in domain expertise knows which metrics to watch—no trial and error.
