

AMI (AUTOMATED MAINFRAME INTELLIGENCE)

Introducing AMI, the new face to BMC's mainframe solutions. AMI enables you to automatically manage, diagnose, heal and optimize mainframe systems without manual intervention. AMI consists of modern analytics technology and built-in machine learning capabilities that will give you predictable and transparent insight into your mainframe environment. AMI is the autonomous driver you need for your mainframe.

AMI Is:

- Intelligent visualization layers that help you understand your data and your environment like never before
- AI-powered anomaly detection for real-time intelligent alarms
- Pattern analysis to predict future performance, capacity or cost conditions
- Intelligent root cause analysis for problem identification and faster resolution times
- Cost-efficient management of peak workloads
- Optimization of the resources you have
- Fast and intelligent database maintenance with no downtime
- Confidence in your ability to quickly perform recovery operations
- Scalability of resources to meet your business demands
- A better way to attract new professionals to the mainframe
- Your mainframe link to enterprise analytics (Splunk, QRadar)

AMI Knows:

SYSTEMS

NETWORKS

STORAGE

CLOUD

MIDDLEWARE

DATABASES

APPLICATIONS

PERFORMANCE

AVAILABILITY

SECURITY

YOUR ENVIRONMENT

ECONOMICS

AMI can help you with the entire range of challenges you're trying to tackle on the mainframe today. Imagine monitoring thousands of metrics and having the system make decisions in real-time to ensure your mainframe is always running at peak performance. Imagine automatically finding and fixing issues before they become problems that impact your business. We're here to help!
