Optimize Db2® Data Management for Digital Business

BMC High Speed Utilities for Db2® with Next Generation Technology Simplify Complexity, Maintain Data Integrity, and Reduce Cost
IDC forecasts that by 2025 the global data sphere will grow to 163 zettabytes (which equals 1 trillion gigabytes). That’s a 10-fold increase in the amount of data created in 2016.¹ This rapid rate of growth is making it increasingly challenging for DBAs to meet customer demands that rely on achieving optimum performance, availability, and response time.

Traditional ways of managing Db2® are inefficient. Too much time is spent on manually reorganizing large tables and indexes. Inefficiencies that require lengthy, manual organization of data put IT at odds with the business that needs to deliver 24x7 availability to their users. BMC High Speed Utilities for Db2® with Next Generation Technology (NGT) are essential to transforming your data management and helping you gain a competitive advantage.

¹ Data Age 2025: IDC White Paper published April 2017
BMC High Speed Utilities for Db2 with Next Generation Technology make interacting with your Db2 database faster, easier, and more affordable so that your DBAs can manage enormous loads of data in the most effective way in an ever-growing digital marketplace. The NGT utilities can automate a wide range of data management tasks to simplify your data management processes.

Make time-consuming and error-prone manual processes a thing of the past. Embrace innovation—such as parallel processing and real-time statistics usage—to exploit machine learning in your environment.

Learn what customers have to say about the benefits of BMC Utilities for Db2 with NGT in this research conducted by TechValidate in the following pages.
GETTING TO 100% AVAILABILITY WITH SIMPLIFIED REORGS

The NGT Utilities have allowed us to reorganize tables that otherwise would have taken an outage to do so.

TRANSFORM YOUR DB2 DATA MANAGEMENT

Take control of your Db2 environment with the advanced technology in these data management utilities from BMC. They deliver intelligent automation, ensure data integrity, and require fewer resources than Db2 solutions from other vendors.

BMC High Speed Utilities for Db2 with NGT enable you to drastically reduce the time and cost of day-to-day database housekeeping operations and provide full availability, even when performing maintenance reorganizations. Your end users have access to their data and you can interact with applications without disruption. This enables you to keep your data organized at all times for optimum performance, protect and ensure the data integrity of structured and unstructured data, and automate as many functions as possible to free up your team for innovation.

Are you ready to gain a competitive advantage while simplifying Db2 data management?
