

Control-M

Output Management WebAccess

Easily deliver business critical information, when and how users need to access it.

Easily searchable

Access reports, statements, and other content that reside in various business and archive systems

Personalized views

Customize report views and add notes

Robust data consumption and reporting

Supports multiple data types and file formats, including IBM Advanced Function Presentation (AFP), Xerox LCDS and metacode, EBCDIC text, and PDF

Automatically receive reports

Subscribe for reports or sections of the reports to automatically receive them when they are created in the repository

DESCRIPTION

Control-M's Output Management WebAccess allows employees, partners, and customers to use a web browser to securely access enterprise content.

BUSINESS CHALLENGE

Customers, partners, auditors and employees need fast, secure, and on-demand access to critical information. The longer it takes to access and report on information, the less valuable the information becomes to your business. When access to information is not securely monitored, your business information can become a vulnerability.

BMC SOLUTION

Provide fast and secure access to critical information saved in the IBM z/OS repository. Users can customize displays to their viewing preferences and mark up electronic copies, reducing the need to print hard copies. Administrators have full control over access permissions and can protect core content, so users cannot make inadvertent changes.

 Provide self-service access to content that users can customize to their viewing preferences

JOB NO.	DESCRIPTION	UNIT	QTY	UNIT	CLASS	DATE IN	DATE	TOTAL	UNIT	UNIT	CLASS
000 000 01	01001	00001	01001	00001	00001	01001	01001	01001	01001	01001	01001
000 000 02	01002	00002	01002	00002	00002	01002	01002	01002	01002	01002	01002
000 000 03	01003	00003	01003	00003	00003	01003	01003	01003	01003	01003	01003

000 000 05	01005	00005	01005	00005	00005	01005	01005	01005	01005	01005	01005

Reporting view with Control-M Output Management WebAccess

CAPABILITIES

Secured access: Guarantee information is distributed only to authorized users, according to the ownership defined during report processing. Includes all SYSOUTS of the jobs running on z/OS and archived in Control-M's Output management, when Control-M's WebAccess is used.

Dynamic reports: Give users the ability to view reports online and mark up the electronic document as if it were a printed copy.

Quickly retrieve information: Give users an easy, straightforward way to define index-based searches.

Automatically receive reports: External users can subscribe to reports or indexed sections of the reports. Subscribers will automatically receive reports immediately after they are created in the repository.

Reformat reports: With Control-M's Output Management WebAccess Logical Views, users can choose to reformat the report layout to their specific interest for improved readability and focus on the relevant report segments.

Automate approvals: Authorized reviewers can automatically approve reports before they are made available for general users.

Integrate repositories with other apps: The Content Integration Toolkit is a software development kit (CIT KIT) that enables home-grown applications to access the reports repository.
