

Control-M

Output Management®

Easily collect, archive, and distribute reports

Collecting – Collect reports from various platforms and applications in multiple output formats and saves in the central IBM® z/OS®-based repository, adding data protection facilities, compression and automated migration to cost-effective storage media

Archiving – Archive reports according to predefined retention criteria

Viewing and distributing – Enable online report viewing and editing, and automatic distribution of saved reports, or selected pages or sections, to appropriate end users

BENEFITS

Quickly collect relevant data with automated output capture

Enhance the security and integrity of stored data

Minimize the space and cost required for storing reports

Securely distribute reports or report sections

Reduce printing and report distribution costs

Answer strict compliance requirements

DESCRIPTION

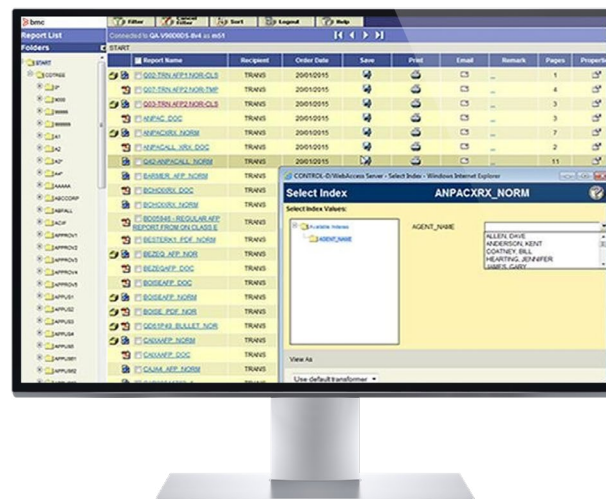

Automatically collect and save data and reports from multiple systems, for easy archiving, retrieval, personalization, distribution and printing.

BUSINESS CHALLENGE

Business users, partners, auditors and customers need quick access to the most relevant information. Collecting data, formatting and distributing reports, managing report access, and archiving reports for future access is often a muddled, time-consuming process.

BMC SOLUTION

Control-M's Output Management allows users to quickly collect data from multiple systems, create and format personalized reports, and archive saved reports for as long as needed, allowing quick, secure access and efficient, low-cost distribution to end users. When complemented with Control M's Output Management WebAccess, it provides anytime, anywhere access for authorized business users through a web interface.

Quickly access and distribute reports, invoices, statements, and other business documents using

CAPABILITIES

Automate every aspect of report management—regardless of the source application, originating platform, storage medium, or report format. This includes report collection, compression, processing, assignment to specific users, archiving, distribution and housekeeping. Business users can access application-generated documents, such as invoices and customer billing statements, or tabular reports, such as trial balances and inventory, from familiar 3270-based interfaces—TSO, ISPF, or VTAM applications, or web interface – if Control-M's Output Management WebAccess is deployed.

Fully automated:

Eliminate the need to run sweep jobs with fully automated output capture.

Secure access:

Assign permissions to users and groups to access full reports or specific sections of reports.

Archived reports:

Access archived documents faster and optimize storage by putting fewer items in temporary storage.

Streamlined printing:

Format complex print streams to view and print content as a PDF on a local printer.
